

How to Create Polls with Data

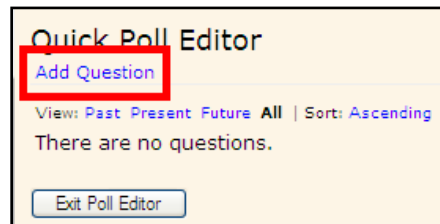

Step 1: From your Course Home Page, select the **Communicate** tab.

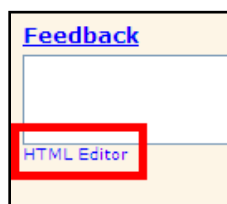

Step 2: Hover over the Course Polls nugget and there should be a row of icons that appear in the top-right corner of the nugget. Click on the first icon, which is a small pencil.

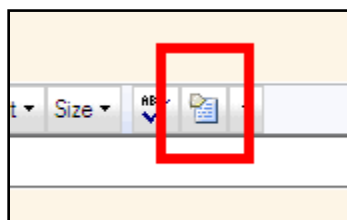

Step 3: On the Quick Poll Editor Page, click on the **Add Question** link.

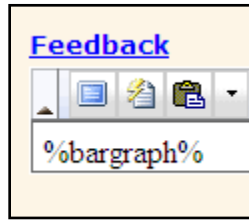

Step 4: On the Question Editor Page, after you have entered in your question, scroll down to the Feedback section and click the **HTML Editor** link to display the row of editing icons.

Step 5: Click on the **Source** icon, which is the last one in the row.

Step 6: In the Feedback text box, type in the following code: **%bargraph%**.

Step 7: Save your question and now when students take your poll, they will get an output with percentages telling them how the class as a whole as answered your poll question.
